

LANRE CROOK

FULL STACK & SYSTEMS SOFTWARE ENGINEER

Remote | crooklanre@gmail.com | github.com/crooklanre | crooklanre.github.io

PROFESSIONAL SUMMARY

Performance-driven Software Engineer specialized in building scalable web applications, backend services, intelligent agentic tools, and systems software. Proficient in low-level and high-level languages including Rust, Go, C++, Python, and JavaScript. Experienced in clean architecture, containerization, and data persistence with Docker and PostgreSQL.

TECHNICAL SKILLS

- **Languages:** Rust, Go, C++, C, Python, JavaScript
- **Frontend & Mobile:** React, Flutter, HTML5, CSS3
- **Backend & Systems:** Docker, PostgreSQL, Agentic Frameworks, REST APIs
- **Tools & Platforms:** Git, GitHub Pages, Netlify

KEY PROJECTS

Local Dev Agent | Python, AI Agents, File Engine

- Engineered a local agentic development workspace with guarded command execution and persistent learning memory.
- Built code indexing and prompt-driven project generation features inside an intuitive browser UI.

ConnectCrypt | JavaScript, Netlify

- Developed a security utility for secure connection handling and request forwarding.

Advance Content Engine | Python, AI/NLP

- Designed a dynamic, prompt-driven content generator tailored for multi-platform campaign automation.

Erudite WBT Platform | HTML, JavaScript, Web Apps

- Created a web-based portal providing software solutions, support, and technical collaboration routing.

EDUCATION & CERTIFICATIONS

- Software Engineering / Computer Science Background
